Office of Statewide Initiatives

Physician Workforce in Nevada: A Chartbook – 2023 Edition
is a publication from the Nevada Health Workforce Research Center
in the Office of Statewide Initiatives at the University of Nevada,
Reno School of Medicine.

The mission of the Office of Statewide Initiatives is to improve the
health of Nevadans through statewide engagement, education, and
research.

The purpose of the Nevada Health Workforce Research Center is to
improve the collection and analysis of data on health workforce
supply and demand to enhance health workforce planning and
development in Nevada.

Physician Workforce in Nevada: A Chartbook – 2023 Edition

Key Findings and Highlights

Physician Workforce in Nevada: A Chartbook provides current data on the supply and geographic distribution of physicians in Nevada. The Chartbook was prepared by the Nevada Health Workforce Research Center in the Office of Statewide Initiatives at the University of Nevada, Reno School of Medicine.

Physician Workforce State Rankings

According to data published by the American Association of Medical Colleges in 2021:

- Nevada's rank among U.S. states is currently 45th for active physicians per 100,000 population, 48th for primary care physicians per 100,000 population, and 49th for general surgeons per 100,000 population (Figure 1).
- Currently, 29.8% of active physicians in Nevada are female (ranked 44th among U.S. states), 27.5% possess a medical degree from another country (ranked 8th), and 32.2% are aged 60 or older (ranked 33rd) (Figure 1).
- Nevada currently ranks 24th among U.S. states for the number of undergraduate medical students per 100,000 population. However, Nevada ranks 41st for the number of residents and fellows per 100,000 population (Figure 2).
- Nevada ranks 21st among U.S. states with 39.8% of physicians completing undergraduate medical education (UME) in Nevada and who are actively practicing in Nevada (Figure 2).
- Nevada ranks 6th among U.S. states with 55.2% of physicians completing graduate medical education (GME) in Nevada and who are active in Nevada (Figure 2).
- Nevada ranks 8th among U.S. states with 76.9% of physicians completing both UME and GME in Nevada and are actively practicing in Nevada (Figure 2).
- Nevada retained 39.8% of physicians who completed their UME in Nevada and are actively practicing as well as 55.2% of the physicians who completed GME in Nevada, and 76.9% of physicians who completed both UME and GME in Nevada (Figure 3).

Licensed Physicians in Nevada

According to licensure data from the Nevada State Board of Medical Examiners and the Nevada State Board of Osteopathic Medicine:

- There are 7,465 physicians (MDs and DOs) with an active license to practice in Nevada. In 2023, 5,291 are located in Clark County (67.0%), 1,670 in Washoe County (22.4%), 218 in Carson City (2.9%), and 286 in the state's 14 rural and frontier counties (3.8%) (Figure 4).
- In 2023, the number of licensed physicians per 100,000 population ranged from 22.3 in Storey County to 509.2 in Carson City (Figure 5).
- Currently, in 36 of 42 specialty areas, per capita rates in Nevada are below the national average, including general surgery, pediatrics, and psychiatry (Figure 5).
- In 35 of 42 specialty areas, per capita rates in Clark County are below the national average, including emergency medicine, family medicine, and psychiatry (Figure 5).
- In 2023, 16.9% or 1,262 of the physician workforce are osteopathic physicians (DO) and 83.1% are allopathic physicians (MD) (Figure 6).
- Approximately half of the osteopathic physicians (565) are licensed in primary care specialties (45.3%), as compared to only 1,943 of allopathic physicians (26.0%) in primary care specialties (Figure 6).
- To highlight the extent of physician workforce shortages in Nevada, there are 11,664 people per psychiatrist in Nevada versus 8,042 people per psychiatrist for the U.S. population (Figure 7).

Physician Workforce in Nevada

According to American Medical Association physician data available through the American Medical Association (AMA) Physician Data File:

- In 2022, there were 9,392 physicians in Nevada – 9,105 were Non-Federal physicians (96.9%) and 287 were Federal physicians (3.1%) (Figure 8).
- There were 7,459 (79.3%) physicians actively practicing in the workforce (Figure 8).
- Seventeen percent (17.6%) of the physician workforce (1,546) is licensed and not actively practicing (Figure 8).
- From 2012 to 2022, the number of actively practicing physicians in Nevada increased by 2,368 or 46.4% – however, the number of active physicians per capita increased by 28.0% (Figure 9).
- In 16 of 41 specialty areas, the number of physicians did not keep pace with population growth over the past decade, including diagnostic radiology, internal medicine, and pediatric medicine (Figure 9).
- Additional physicians needed to meet the national average increased by 3,178 physicians and 2,475 of these physicians are needed in Clark County (Figure 10).
- The average age of a physician in Nevada (MDs only) is 56.3 years – among actively practicing physicians, the average age is 51.6 years versus an average age of 74.3 among physicians with an inactive license (Figure 11).
- There are only three specialties in Nevada in which the average age of the physicians is younger than 50 years: family medicine subspecialties (46.4 years), emergency medicine (48.8 years), and radiology (49.9 years) (Figure 11).

Graduate Medical Education (GME) in Nevada

Each year, the Nevada Health Workforce Research Center undertakes a survey of physicians completing graduate medical education (GME) programs in Nevada. Highlights from the 2023 report include:

- In 2023, there were 269 GME graduates in Nevada, including 226 from residency programs and 43 from fellowship programs (Figure 12).
- There were 215 graduating residents and fellows from southern Nevada and 54 from northern Nevada in 2023 (Figure 13).
- In 2023, 47.2% of GME graduates indicated they will remain in Nevada to begin clinical practice or continue training, as compared to 52.8% who will leave the state (Figure 14).
- Approximately one in four physicians completing GME (24.5%) are leaving Nevada for additional subspecialty training that does not exist or is in short supply in Nevada (Figure 14).
- Retention of GME graduates in southern Nevada (50.7%) is higher than in northern Nevada (33.4%) (Figures 15 and 16).
- Over the past decade, 1,699 physicians have graduated from GME programs in Nevada – the majority of graduates (1,276 or 75.14%) were from GME programs in southern Nevada (Figures 17 through 19).
- Since 2014, the number of GME graduates in both primary care and specialty care residencies in southern Nevada increased substantially – however, the number of graduates from northern programs increased at a slower rate (Figures 20 and 21).

Health Professional Shortage Areas (HPSAs) in Nevada

According to Health Professional Shortage Area (HPSA) data managed by the Health Resources and Services Administration (HRSA):

- Currently, an estimated 2,282,125 Nevadans or 69.7% of the state’s population reside in a federally designated primary care HPSA (Figures 22 and 23).
- Twelve of 17 counties in Nevada are single-county primary care HPSAs including 11 of 14 rural and frontier counties (Figures 22 and 23).
- In urban southern Nevada (Clark County), an estimated 1.6 million residents or 64.5% of the county population resides in a primary care HPSA (Figures 22 and 24).
- In urban northern Nevada (Carson City and Washoe County), an estimated 479,511 residents or 85.1% of the region’s population resides in a primary care HPSA (Figures 22 and 25).
- Currently, 2.8 million Nevadans or 86.9% of the state’s population reside in a federally designated mental health HPSA – 15 of 17 counties in Nevada are single-county mental health HPSAs (Figures 22, 26, and 27).
- One hundred percent of the state’s 302,794 rural and frontier residents live in a mental health HPSA (Figures 22 and 26).

The Chartbook includes data about the physician workforce and Graduate Medical Education (GME) training of physicians in Nevada. The data includes state physician workforce rankings, number of physicians per capita, recent trends in the geographic and specialty distribution of the physician workforce, retention of physicians who have completed residency and fellowship programs, and shortage areas in Nevada for primary care and mental health professionals.

The report utilizes current data from state licensing boards in 2023, as well as data from the American Medical Association’s (AMA) physicians workforce master file (2022), and the American Association of Medical Colleges (AAMC) State Physicians Workforce Data Book for the calendar year 2020. Population estimates from the Nevada State Demographer’s Office (2023) were used to calculate per capita rates.

Figure 1: State Physician Workforce Rankings

Physician Workforce Indicators	2010			2020		
	Rank	Nevada	U.S.	Rank	Nevada	U.S.
Physician Workforce Supply in Nevada						
Physicians per 100,000 Population	45	198.3	258.7	45	218.5	272.0
Patient Care Physicians per 100,000 Population	44	178.1	219.5	48	190.2	239.8
Primary Care Physicians per 100,000 Population	46	71.2	90.5	48	73.5	94.7
Patient Care Primary Care Physicians per 100,000 Population	46	63.7	79.4	48	65.9	84.5
General Surgeons per 100,000 Population	–	–	–	49	5.7	7.7
Patient Care General Surgeons per 100,000 Population	–	–	–	50	5.0	7.0
Physician Workforce Demographics (%)						
Female Physicians	44	25.0%	30.4%	44	29.8%	36.1%
Physicians with International Medical Degree	7	27.9%	24.0%	8	27.5%	19.7%
Physicians Aged 60 or Older	30	24.5%	26.2%	33	32.2%	32.9%
Active Physicians Who Identify as Asian	–	–	–	4	23.9%	13.7%
Active Physicians Who Identify as Black or African American	–	–	–	17	5.0%	3.8%
Active Physicians Who Identify as Hispanic, Latino or of Spanish Origin	–	–	–	6	5.3%	3.2%
Active Physicians Who Identify as American Indian or Alaska Native	–	–	–	20	0.5%	0.4%
Active Physicians Who Identify as Native Hawaiian or Other Pacific Islander	–	–	–	3	0.5%	0.1%
Active Physicians Who Identify as Other Race/Ethnicity	–	–	–	7	2.2%	1.4%
Active Physicians Who Identify as White	–	–	–	41	53.8%	67.3%

Source: Nevada State Board of Medical Examiners (2022). Nevada State Board of Osteopathic Medicine (2022). American Medical Association (2022). All source retrieved July 1, 2023.

Note: Red figures denote rates lower than the U.S. average and green figures denote rates at or greater than the U.S. average. Pediatrician rate per 100,000 is based on population aged less than 18. All data refer to allopathic (MD) and osteopathic (DO) physicians with an active license to practice in Nevada during the calendar year 2022. Geriatric (65+), OB-Gyn(18+), and Pediatric Medicine (<18) specialties are weighted by population.

Source: United States Census Bureau (2022a), Health Resources and Services Administration (2023), and Nevada State Demographer's Office (2022).

Note: Data in this table are preliminary estimates of the population residing in health professional shortage areas (HPSA) at the county, regional, and state levels based on current population data from the American Community Survey and the Nevada State Demographer's Office. Final estimates are pending until all geographic area designations proposed for withdrawal in 2022 have received a final score from the federal Health Resources and Services Administration (HRSA).
